Sixth, news releases will be given to the Denton media to publicize the Board's efforts and accomplishments.

Seventh, the Board will establish a re-routing system to channel the findings and actions taken on citizen's complaints after those complaints are placed with the proper authority within the City's structure.

The Board's final goal will be to meet twice a month as it will become necessary to do so once the operating system proposed becomes active. With the City Council's assistance, the Board looks forward to serving both that body and the community with its best efforts.
